SKILLS

Languages: Python, Java, JavaScript, TypeScript, C/C++, SQL

Frontend: React.js, Redux Toolkit, Vite, Tailwind CSS, Material-UI, Framer Motion

Backend: Node.js, Express.js, Python, REST APIs

Databases & Data: PostgreSQL, MongoDB, MySQL, Supabase, Apache Spark, ETL Pipelines

AI/ML: TensorFlow, Scikit-learn, Pandas, NumPy, Google Gemini API, LangChain, LLM Fine-tuning

Tools & Platforms: Docker, Git, AWS, Azure, Linux, Jupyter Notebook

EDUCATION

Vishwakarma University, Pune

2024 – 2027

B.Tech. Computer Science & Engineering

Current: Semester II, Year 3

AISSMS Polytechnic, Pune

2021 – 2024

Diploma in Computer Engineering

Graduated: Jun 2024

PROFESSIONAL EXPERIENCE

Senior Data Engineer Intern — Hackveda Solutions Private Limited

Mar 2026 – May 2026

New Delhi, India (Remote)

- Designed and deployed scalable ETL pipelines processing **100K+ records daily**, improving data throughput by **40%** and reducing processing time by **35%**.
- Built real-time data processing systems with **Apache Spark** on **AWS/Azure**, architecting cloud-native solutions for distributed data workflows.
- Technologies:** Python, SQL, Apache Spark, AWS, Azure, Docker, Git

Data Science Intern — Infeanet Digital Solution & Web Media

Jun 2023 – Jul 2023

Remote

- Built production ML models achieving **85%+ accuracy** on predictive tasks through rigorous feature engineering and model evaluation.
- Performed correlation analysis and feature transformation, improving dataset quality and model performance by **25%**.
- Technologies:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

PROJECTS

- AI-Powered Learning Management System — Vite, React, Supabase, Google Gemini API** Intelligent education platform with AI-driven personalization and real-time analytics.
 - Integrated **Google Gemini API** for AI-generated quizzes, course summaries, and personalized recommendations based on user learning patterns.
 - Engineered scalable **recommendation engine** analyzing user activity, improving engagement by **40%**.
 - Implemented secure authentication and real-time data synchronization using **Supabase (PostgreSQL + Auth)**.
 - Designed responsive dashboard with analytics visualization for progress tracking and performance insights.

PUBLICATIONS & ACHIEVEMENTS

- Published Research:** “Human Resource Management System Using AI and Machine Learning” — International Journal of Innovative Research in Computer and Communication Engineering (IJIRCCE), Vol. 12, Issue 3, Mar 2024 — Impact Factor: 8.379 — Indexed in Google Scholar, Crossref, Mendeley
- IoT Innovation:** Designed LoRa-based smart lighting system for energy-efficient adaptive street lighting, demonstrating expertise in IoT architectures and wireless protocols for smart city infrastructure.
